FIREGLOW USE INSTRUCTIONS

STEP 1

ADD SAND

Before using, add a 1-1.5 in. layer of sand or about 5 lbs. (size wise, its the same amount as a 5 lb. bag of sugar) to the bottom of the firebowl. This will help neutralize the corrosive nature of the ashes and help radiate the heat upwards.

STEP 2

ADD FUEL

Add up to 5 lbs. of kindling and firewood to the firebowl. Use paper or firestarter under the kindling and light with a match. Add more firewood as needed. The capacity of the fire pit is 5 lbs. of fuel.

ADD COVER

After using, use cover [L] only after the fire is completely extinguished and the fire pit is completely cool to the touch.

FIREGLOW USE INSTRUCTIONS

USAGE TIPS!

The firebowl has a porcelain finish which is very durable and will provide excellent resistance to heat. Proper care will provide many seasons of carefree use. Follow these tips for long life.

Do not drop or throw firewood in the firebowl, this will cause the porcelain to chip and could cause hot embers to fly out of the firebowl.

Avoid excessive poking, rubbing or striking to the porcelain finish as it will cause chipping.

If the porcelain does happen to chip, use caution as the chips and the chipped area can be very sharp and can cause injury.

Do not pour water directly onto a hot firebowl, this will cause the porcelain to chip, craze or pit. IF THERE IS AN EMERGENCY, USE WATER IF NEEDED!

Do not overfill the fire pit.

Always use on level surface.

Avoid behavior that could cause the fire pit to tip over.

Keep loose clothing away.

Adults need to keep watch and supervise children and pets when around the fire pit during use.

For longer product life, keep fires to a respectable size, do not overload.

CLEANING

For best results, the fire pit should be cleaned after every use. Make sure fire pit is cool and all embers are extinguished before cleaning.

If any remaining firewood needs to be removed, use poker or shovel to remove. Any sand can be reused.

Dispose of ashes in proper receptacle only after ashes have cooled. Do not dump ashes where a fire can be started.

If the fire pit needs to be cleaned, use a mild soap and water with a soft rag. Dry thoroughly to prevent rust. Use caution as some parts can be sharp.

Occasionally, the fire pit finish will need to be refinished. Use a high quality, high heat paint to renew the finish.

**HELPFUL HINTS:**

- KEEP THE FIRE PIT OUT OF THE WEATHER AND ELEMENTS.
- STORE THE FIRE PIT IN A DRY LOCATION OUT OF THE WEATHER.
- DO NOT LEAVE OUTDOORS WHERE THE FIREBOWL CAN COLLECT WATER.
- DO NOT DUMP ASHES WHERE A FIRE CAN BE STARTED.
- DISPOSE OF ASHES IN PROPER RECEPTACLE ONLY AFTER ASHES HAVE COOLED.
- USE ANY COVER ONLY AFTER THE FIRE PIT IS COMPLETELY COOL TO THE TOUCH.
- STORE THE FIRE PIT IN AN AREA SO THAT IT WON'T BE PRONE TO TIPPING OVER AND BEING A HAZARD.
